

CONNECT NORTHWEST NETWORK CABLING AND WI-FI

WWW.CNW.COM/NETWORK-CABLING

Design and installation of structured network cable, VOIP and Wi-Fi for data, telephone, video and audio. Single room, multi-story and campus-wide rollouts for simple to complex scenarios and environments.

Connect Northwest installs network cabling for businesses and homes. From a single conference room to multi-building campuses, our engineers and technicians design and place everything you need to operate your network and equipment. In addition to running cable, Connect Northwest can install the technology and infrastructure necessary for operating a network, including outlets, patch panels, switches, cable troughs, wireways and rack accessories.

Connect Northwest is a licensed, bonded and insured contractor. We work directly with businesses and home owners, and as subcontractors in construction and office building projects.

NETWORK DESIGN AND LIGHTING

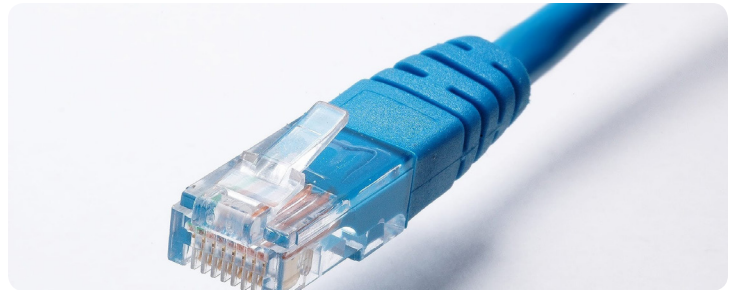

The engineers of Connect Northwest are experienced technologists, specialists in creating local and wide area networks. We work with many of the leading companies in technology, telecommunications and entertainment. Our consultants and engineers can design, install and light-up your network.

Connect Northwest also offers ongoing monitoring and managed services for your network and servers.

STRUCTURED CABLING

Offices rely on different types of cables to operate their technology. In addition to Ethernet Cat 5E or Cat 6, workplaces may need fiber optic and HDMI as well as coax, audio, video and even telephone cabling. Connect Northwest structures cabling to match your office plan. Whether you want wall-mounted monitors, movable workstations or surround sound speakers in your conference room, our technicians can install your cabling, mount your hardware and equipment and hook everything up.

WI-FI WIRELESS NETWORK

Expand you employees' productivity with the mobility and convenience of a secure Wi-Fi network. Offer safe and reliable Internet access to visitors, customers and guests, without giving them access to your internal business network. Connect Northwest creates robust, resilient Wi-Fi wireless networks for:

- Common Areas in Buildings
- Offices
- Stores

Call 1-888-583-3171 and a Connect Northwest representative will be happy to assist you in answering your questions about network design and cabling.
