

Connect NorthWest is a leader in Internet connectivity for businesses. We offer various access options and top rated support teams to provide you with the flexibility and convenience you deserve. Our robust and redundant network, combined with cutting edge equipment, ensures fast and reliable connections for your business or home that are second-to-none. Discover the various options available to meet your specific Internet connectivity needs.

CORPORATE DEDICATED CIRCUITS

Connect NorthWest is a leading provider of Dedicated Circuits for businesses requiring connectivity that is more reliable, more secure, and faster than Cable and DSL.

Corporate Dedicated Circuits consist of point-to-point connection to the Internet that carry approximately 40 times more data per second than a traditional residential modem. Our redundant connections provide uninterrupted service that consistently exceeds 99.99% network availability, offering your business the highest performing Internet access available. Your business cannot afford to settle for anything less than the very best quality and protection when it comes to maintaining your critical Internet operations. Our network features equipment from suppliers like Cisco and Dell to ensure quality is not compromised. The equipment is located in a secure Network Operating Center (NOC) that is monitored 24 hours a day and accessible by authorized users only to ensure your business is always protected.

Get your business functioning at full capacity today with high-powered dedicated service available anywhere in the United States and most of Canada. We offer T1s, Bonded T1s, DS3 Internet and above, Private Network Connections (PTP, T1 and greater), Metro Ethernet Solutions and more. To review what connections your business qualifies for please contact an Connect NorthWest sales representative today!

Our range of services, network capacity and customer-focused support combine to provide a high level of quality. We deliver outstanding value by providing high quality at a competitive price: This is the Connect NorthWest commitment.

BUSINESS BROADBAND

Connect NorthWest offers Digital Subscriber Line (DSL) service providing high-speed Internet access over existing telephone lines. DSL is an inexpensive alternative for businesses that need fast access to the Internet but don't want to invest in dedicated service. Connect NorthWest partners with every primary telephone provider nationwide, offering the highest availability possible. Check back often if you're located in an unserviceable area because plans and coverage frequently change.

Take Advantage of the Following DSL Advantages:

- High quality of service
- Full-service customer support by phone, fax or email
- Flat-rate billing, no "surprise" charges
- Spam and virus filtration system (SpamCatcher and VirusCatcher)
- A wide range of speeds and symmetric services (ADSL, SDSL, IDSL)
- Fast, always on, secure, reliable, affordable connection time
- Service Level Agreements (SLAs)

Discover how DSL works and which option is best for your business by visiting the Business DSL FAQ (ConnectNorthWest.com/connectivity). Still wondering if Connect NorthWest is the right choice for your business?
